AM Best Rating Outlooks & Modifiers

Positive	Indicates a company's financial/market trends are favorable, relative to its current rating level and, if continued, the company has a good possibility of having its rating upgraded.
Stable	Indicates a company is experiencing stable financial/market trends and there is a low likelihood that its rating will change in the near term.
Negative	Indicates a company is experiencing unfavorable financial/market trends, relative to its current rating level and, if continued, the company has a good possibility of having its rating downgraded.
U	A modifier that generally is event-driven (positive, negative or developing) and is assigned to a company whose Best's Rating opinion is under review and may be subject to change in the near-term, generally defined as six months.
pd	Ratings reflect qualitative and quantitative analyses using public data and information.

Standard & Poor's Rating Outlooks & Modifiers

Plus (+) or Minus (-)	Signs following ratings from 'AA' to 'CCC' show relative standing within the major rating categories.
CreditWatch	CreditWatch highlights the potential direction of a rating, focusing on identifiable events and short-term trends that cause ratings to be placed under special surveillance by Standard & Poor's.
pi	Ratings based on an analysis of published financial information and additional information in the public domain. They do not reflect in-depth meetings with an insurer's management nor do they incorporate material non-public information, and are therefore based on less comprehensive information than ratings without a 'pi' subscript.

Fitch Rating Outlooks & Modifiers

Plus (+) or Minus (-)	May be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' category or to categories below 'CCC'.
NR	Indicates that Fitch Ratings does not publicly rate the issuer or issue in question.
Withdrawn	A rating is withdrawn when Fitch Ratings deems the amount of information available to be inadequate for rating purposes, or when an obligation matures, is called, or refinanced.
Rating Watch	Indicates a reasonable probability of a rating change and the likely direction of such change. These are designated as "Positive", indicating a potential upgrade, "Negative", for a potential downgrade, or "Evolving", if ratings may be raised, lowered or maintained. Rating Watch is typically resolved over a relatively short period.
Outlook	Indicates the direction a rating is likely to move over a one to two-year period. Outlooks may be positive, stable, or negative. A positive or negative Outlook does not imply a rating change is inevitable. Occasionally, Fitch may be unable to identify the fundamental trend, and in these cases, the Rating Outlook may be described as "evolving".
